

We're sending this email to you because you've ordered angraecoids or Bulbophyllums from us and/or have expressed an interest in such notifications. In case you're not aware, Michelle Andriamanamihaja of Malala Orchidees died last year. It was sad to learn.

We have a new source in Madagascar for many of the same plants, along with a few new ones and will be placing an order this spring. If you'd like to place a pre-order, you must do so by **May 8**. We hope to have them arrive in the U.S. and shipped to you in **early June**.

Following is a price list of the orchids.

Please place your order via email. Your total payment will be calculated and you will be notified by **May 10**. Your payment must be received by **May 12**. The shipping cost will be based on how many and which plants you order, i.e. a large order of larger sized plants will cost more to ship from us to you. For example, the Cynorkis are dormant and are tiny "bulbs" whereas the Eulophiellas are large and must ship in boxes that exceed the standard USPS one cubic foot rate. The plants will be sent via USPS Priority Mail (unless you request and pay otherwise) within one day of arrival at Botanica Ltd.

Please do keep in mind, that though these plants will be healthy when they depart Madagascar, the import process is traumatic. Imported orchids are always somewhat stressed and can be challenging. These plants will be coming to us from the southern hemisphere where it will be approaching their autumn while it will be our spring.

You can pay with a credit card by calling us at [406-721-3256](tel:406-721-3256), by PayPal using our email address or you may mail your payment.

Please email with questions.

I suspect that there are a few mis-identified plants (as was the case with Malala Orchidees) so I've added notes **IN RED** to that regard; or to plants that now go by different names.
